M801 GREASE

M801 Grease is a very heavy duty, extreme pressure, multi purpose grease containing molybdenum disulfide and special polymers. It is designed for the extra duty requirements of heavy industry such as power plants, paper & steel mills and mining & ore processing applications. It's special polymers, EP agents, high melting point and moly give it outstanding adhesiveness and show load-carrying ability.

- Superior High & Low Temperature Performance
- Highly Adhesive – Stays Put
- Polymers Cushion Shock Loads
- Extreme Pressure & Anti-Wear Performance
- Excellent Water Resistant & Rust Protection
- Wide Operating Temperature Range (-20° F to 400° F)
- Pumps Easily But Does Not Run

M801 Grease is intended for use in low to high speed bearing applications and for sliding and rotating devices. These unique properties and its more fluid consistency give it exceptional performance in central systems, automatic lube systems on trucks and off road equipment, and semi-fluid coupling applications.
